Approximate low water line

Shoal lines

The light line around the mangrove defines the outer limits of vegetation visible above mean high water. The mean high water line (intersection of the plane of mean high water with the ground) is shown only on fast land and is represented by a heavy solid line.

This map, without contours, is a reproduction of the original drawing completed from air photographs taken in January, 1935 and supplemented by other surveys to April 4, 1938.
