THE ECOLOGY OF THE MANGROVES OF SOUTH FLORIDA:
A COMMUNITY PROFILE

by

William E. Odum
Carole C. McIvor
Thomas J. Smith, III

Department of Environmental Sciences
University of Virginia
Charlottesville, Virginia 22901

Project Officer

Ken Adams
National Coastal Ecosystems Team
U.S. Fish and Wildlife Service
1010 Gause Boulevard
Slidell, Louisiana 70458

Performed for
National Coastal Ecosystems Team
Office of Biological Services
Fish and Wildlife Service
U.S. Department of the Interior
Washington, D.C. 20240

and

New Orleans OCS Office
Bureau of Land Management
U.S. Department of the Interior
New Orleans, Louisiana 70130

CONTENTS

	<u>Page</u>
PREFACE	iii
FIGURES	viii
TABLES	viii
ACKNOWLEDGMENTS	ix
CHAPTER 1. INTRODUCTION	1
1.1 "Mangrove" Definition	1
1.2 Factors Controlling Mangrove Distribution	1
1.3 Geographical Distribution	2
1.4 Mangrove Species Descriptions	5
1.5 Mangrove Community Types	7
1.6 Substrates	9
1.7 Water Quality	11
CHAPTER 2. AUTECOLOGY OF MANGROVES	12
2.1 Adaptations to Natural Stress - Anaerobic Sediments	12
2.2 Adaptations to Natural Stress - Salinity	12
2.3 Reproductive Strategies	14
2.4 Biomass Partitioning	15
2.5 Primary Production	17
2.6 Herbivory	23
2.7 Wood Borers	24
2.8 Mangrove Diseases	25
CHAPTER 3. ECOSYSTEM STRUCTURE AND FUNCTION	26
3.1 Structural Properties of Mangrove Forests	26
3.2 Zonation, Succession and "Land Building"	26
3.3 Nutrient Cycling	30
3.4 Litter Fall and Decomposition	32
3.5 Carbon Export	34
3.6 Energy Flow	36
CHAPTER 4. COMMUNITY COMPONENTS - MICROORGANISMS	40
CHAPTER 5. COMMUNITY COMPONENTS - PLANTS OTHER THAN MANGROVES	41
5.1 Root and Mud Algae	41
5.2 Phytoplankton	43
5.3 Associated Vascular Plants	43

CONTENTS (continued)

	<u>Page</u>
CHAPTER 6. COMMUNITY COMPONENTS - INVERTEBRATES	45
6.1 Ecological Relationships	45
6.2 Arboreal Arthropod Community	47
6.3 Prop Root and Associated Mud Surface Community	47
6.4 Water Column Community	49
CHAPTER 7. COMMUNITY COMPONENTS - FISHES	50
7.1 Basin Mangrove Forests	50
7.2 Riverine Forests	52
7.3 Fringing Forests along Estuarine Bays and Lagoons	54
7.4 Fringing Forests along Oceanic Bays and Lagoons	56
7.5 Overwash Mangrove Islands	56
7.6 Gradient of Mangrove Community Interactions	57
CHAPTER 8. COMMUNITY COMPONENTS - AMPHIBIANS AND REPTILES	58
CHAPTER 9. COMMUNITY COMPONENTS - BIRDS	61
9.1 Ecological Relationships	61
9.2 Wading Birds	61
9.3 Probing Shorebirds	65
9.4 Floating and Diving Water Birds	65
9.5 Aerially-searching Birds	67
9.6 Birds of Prey	67
9.7 Arboreal Birds	68
9.8 Associations between Mangrove Community Types and Birds	70
9.9 Mangroves as Winter Habitat for North American Migrant Land Birds .	71
CHAPTER 10. COMMUNITY COMPONENTS - MAMMALS	72
CHAPTER 11. VALUE OF MANGROVE ECOSYSTEMS TO MAN	74
11.1 Shoreline Stabilization and Storm Protection	74
11.2 Habitat Value to Wildlife	74
11.3 Importance to Threatened and Endangered Species	75
11.4 Value to Sport and Commercial Fisheries	75
11.5 Aesthetics, Tourism and the Intangibles	75
11.6 Economic Products	76
CHAPTER 12. MANAGEMENT IMPLICATIONS	77
12.1 Inherent Vulnerability	77
12.2 Man-induced Destruction	77
12.3 Effects of Oil Spills on Mangroves	80
12.4 Man-induced Modifications	81
12.5 Protective Measures Including Transplanting	84
12.6 Ecological Value of Black vs. Red Mangroves	85
12.7 The Importance of Inter-community Exchange	85
12.8 Management Practices: Preservation	86

CONTENTS (continued)

	<u>Page</u>
REFERENCES	88
APPENDIX A: SUMMARY OF SITE CHARACTERISTICS AND SAMPLING METHODOLOGY FOR FISHES	106
APPENDIX B: FISHES OF MANGROVE AREAS	110
APPENDIX C: AMPHIBIANS AND REPTILES FROM MANGROVE AREAS	127
APPENDIX D: AVIFAUNA OF MANGROVE AREAS	130
APPENDIX E: MAMMALS OF MANGROVE AREAS	142

FIGURES

<u>Number</u>		<u>Page</u>
1	Approximate northern limits for the red mangrove (R), black mangrove (B), and white mangrove (W) in Florida	3
2a	A typical intertidal profile from south Florida showing the distribution of red and black mangroves	4
2b	The pattern of annual sea level change in south Florida	4
3	Three species of Florida mangroves with propagules, flowers and leaves.	6
4	The six mangrove community types	8
5a	Aboveground and belowground biomass of a Puerto Rican red mangrove forest	16
5b	Light attenuation in a mangrove canopy; canopy height is 8 m	16
6	The hypothetical relationship between waterway position and community net primary production of Florida mangrove forests	22
7	The hypothetical relationship between nutrient input, biomass, productivity, and nutrient export from mangrove ecosystems	31
8	Potential pathways of energy flow in mangrove ecosystems	37
9	Vertical distribution of selected algae and invertebrates on red mangrove prop roots	42
10	Photograph of red mangrove prop root habitat in clear shallow water with associated animal and plant populations	46
11	Gradient of mangrove-associated fish communities showing representative species	51
12	Aerial photograph of the mangrove belt of southwest Florida near Whitewater Bay	53
13	The mangrove water snake, <i>Nerodia fasciata compressicauda</i> , curled on a red mangrove prop root	59
14	A variety of wading birds feeding in a mangrove-lined pool near Flamingo, Florida	62
15	Osprey returning to its nest in a red mangrove near Whitewater Bay	69
16	Damaged stand of red and black mangroves near Flamingo, Florida, as it appeared 7 years after Hurricane Donna	78
17	Mangrove forest near Key West as it appeared in 1981 after being destroyed by diking and impounding	79
18	Mangrove islands in Florida Bay near Upper Matecumbe Key	87

TABLES

<u>Number</u>		<u>Page</u>
1a	Estimates of mangrove production in Florida	20
1b	Comparative measurements of photosynthesis in gC/m ² /day	21
1c	Gross primary production at different salinities	21
2	Aboveground biomass of mangrove forests in the Ten Thousand Islands region of Florida	27
3	Estimates of litter fall in mangrove forests	33
4	Estimates of particulate carbon export from mangrove forests	35
5	Nesting statistics of wading birds and associated species in south Florida, 1974-75	64
6	Timing of nesting by wading birds and associated species in south Florida	66
7	General response of mangrove ecosystems to severe oil spills	82
8	Estimated impact of various stages of oil mining on mangrove ecosystems	83

ACKNOWLEDGMENTS

Many individuals and organizations contributed significantly to the creation of this publication. Most notable was Eric Heald who worked extensively with us on the manuscript and contributed unpublished data. We thank Jeffrey Carlton, Edward Conner, Roy R. Lewis, III, Ariel Lugo, Larry Narcisse, Steven Macko, Aaron Mills, Michael Robblee, Martin Roessler, Samuel Snedaker, Durbin Tabb, Mike Weinstein, and Joseph Zieman for information and helpful advice.

The draft manuscript was reviewed for its scientific content by Armando de la Cruz, Thomas Savage, James Kushlan (bird section), and James P. Ray. Each of these

individuals provided information as well as critical comments. We particularly appreciate the unselfish help of Ken Adams and the staff of the National Coastal Ecosystems Team of the U.S. Fish and Wildlife Service. Janet Ryan spent many hours typing the manuscript.

Factual errors and faulty conclusions are the sole responsibility of the authors. Carole McIvor has taken primary responsibility for Chapter 7, Tom Smith for Chapters 8, 9, and 10, and Bill Odum for the remainder of the publication. Unless otherwise noted, photographs, figures, and the cover were produced by the authors.
